-3x LOWER
than the **STATE AVERAGE**

Information available includes: real time access to your claim information that includes reserve amounts and paid to date information from the BWC as well as information regarding hearings, access to documents, images and notes; a watch list of claims being closely monitored; alerts to track claim activity; a catalog of reports and adhoc querying options.

Cost Reduction Strategies

We utilize a combination of techniques employed by our colleagues and specific programs designed to mitigate the primary cost drivers for our clients. Cost containment strategies are extremely important in the claims management process and having consistency year in and year out with those strategies proves to be beneficial for employers. CompManagement has demonstrated consistency in our Settlement and Handicap process for many years. Have the confidence in knowing that CompManagement not only focuses on when and where we can apply these strategies, but when we do, we generate the most savings for you, our valued client. Cost containment strategies are not simply about quantity, it’s about producing quality results!

- In reviewing the most recent four years of data available from BWC, we have settled **10% more settlements** and filed **35% more handicaps** than our nearest large competitor.
- Even more important than the number of settlements filed, CompManagement has the **lowest** average of lump sum settlement pay out than any of our large TPA competitors. Lower settlement amounts mean lower claim costs applied to an employer’s experience which is a direct impact to your annual premium paid. Cost containment is not simply about quantity, it is about producing quality results on a consistent basis.
